Email Security & Phishing Analysis Report

Email Risk Analyzer — Synthetic Demonstration

This report documents a local heuristic audit of a synthetic raw email.

Indicator	Result
SPF	Failure represented in sample
DKIM	Failure represented in sample
DMARC	Failure represented in sample
From / Return-Path	Domain mismatch detected
Urgent language	Multiple lure phrases detected
Risk	HIGH in synthetic demonstration

Limitations

This score is heuristic. The script does not cryptographically verify DKIM, perform DNS-based SPF validation, evaluate DMARC policy, or use reputation/malware services.

Safety Note

The included email is synthetic and uses reserved example domains. Do not interact with suspicious links or submit private email content to untrusted services.
